

HEUSSEN: Leading provider of quantum computing applications Terra Quantum accompanied in financing round

Munich, Jan. 21, 2022 - Zurich-based Terra Quantum AG, one of the world's leading quantum technology companies, has raised \$60 million in a financing round. This enables further investment in research and acceleration of international expansion and underpins Terra Quantum's leading market position in the development of quantum computing applications. HEUSSEN advised the financing round with Clemens Richter, partner in the corporate department and specialized in capital rounds, together with Florian Gunz Niedermann, also specialized in corporate and partner at Walder Wyss Attorneys at Law in Zurich.

Corporate law is one of HEUSSEN's core areas of expertise. More than 30 partners and lawyers advise in particular on transactions, financing rounds and restructurings. National and international clients are advised across all offices on all corporate law matters as well as on all questions relating to corporate organisation. The team also has extensive experience in cross-border matters.
